Profile

I turn product needs into software solutions, combining web development, AI and infrastructure. I connect applications and systems from prototyping to release, with a focus on automation and practical use.

Core Stack

Languages & Web
PHP, JavaScript, Python, Java, Swift, HTML5, CSS, MySQL, REST APIs

Delivery & Infra
CI/CD, Docker, Linux, Proxmox, ZFS, VLANs, VPNs, routing

Frameworks & Tools
Angular, Ionic, Blender, Git, OpenAPI, Apple Vision Pro prototyping

Languages

Italian
Native

English
Cambridge B2

Highlights

Personal projects
I combine self-hosted infrastructure and Python development: AI agent extensions, voice and telephony integration, and MCP connectors.

Sport
International-level dancer and 17-time Italian champion. I bring pressure management, goal planning and continuous improvement through feedback to my work.

Soft skills
Communication and listening, collaboration across technical roles, independent problem solving and adapting to new tools.

Work Experience

Netsons

January 2025 - Present

Software Developer

- Develop PHP/JavaScript web services and integrate applications with infrastructure alongside the systems team.
- Automate web service releases through CI/CD pipelines and Docker-based environments.
- Develop with Codex and Claude Code; study AI model capabilities and limitations to select tools, context and approaches suited to each task.

PHP · JS · HTML5 · CSS · MySQL · Web RESTful Services · CI/CD · Docker

Aptar

2023 - 2024

Internship - AI and Computer Vision PoC

- Automated synthetic product dataset generation with Python tools for Blender and trained a YOLO model for visual recognition.
- Developed an AI proof of concept for marketing across web, mobile and Apple Vision Pro, usable online and offline, with Angular, Ionic and Swift.

Python · Angular · Ionic · CI/CD · Docker · Swift

Education

Politecnico di Torino

In progress

Master's degree in Computer Engineering

Track: *Computing and Network Infrastructures*: cloud computing, distributed systems, computer architectures, and enterprise networks. Member of PoliTO's **Dual Career** programme, combining university studies and competitive sport.

University of L'Aquila

March 2025

Bachelor's degree in Computer Science (100/110)

Studies in software development, AI/ML, web engineering, and object-oriented programming. Thesis: *Computer Vision and Mixed Reality for Product Prototyping with Apple Vision Pro*.

Projects and Infrastructure

Self-hosted infrastructure and services
Proxmox · LXC · ZFS · VLAN · Traefik · Pocket ID
Private infrastructure with VMs/LXC, ZFS storage and VLAN networking; centralized service access with Traefik and Pocket ID and Home Assistant automations.

AI assistant, voice and automation
Python · Hermes · LiveKit/SIP · MCP · Docker
Python extensions for specialist agents, memory and tasks in Hermes; LiveKit/SIP voice and telephony, MCP connectors and persistent requests with authorization controls.

Other software projects
PHP · JavaScript · MySQL · OpenAPI · Python · Java/JavaFX
E-commerce, room and event management through REST APIs, a Java/JavaFX application and a Python recommendation system; a small neural network implemented from scratch.
