Marco D'Antonio

Software Developer · 26 years old

Pescara, PE | +39 3338880522 | me@marcodantonio.it
github.com/marcodantonio | LinkedIn | marcodantonio.it

I turn product needs into software solutions, combining web development, AI and infrastructure. I connect applications and systems from prototyping to release, with a focus on automation and practical use.

Work Experience

Netsons
January 2025 - Present

Software Developer

- Develop PHP/JavaScript web services and integrate applications with infrastructure alongside the systems team.
- Automate web service releases through CI/CD pipelines and Docker-based environments.
- Develop with Codex and Claude Code; study AI model capabilities and limitations to select tools, context and approaches suited to each task.

Stack: PHP · JS · HTML5 · CSS · MySQL · Web RESTful Services · CI/CD · Docker

Aptar
2023 - 2024

Internship - AI and Computer Vision PoC

- Automated synthetic product dataset generation with Python tools for Blender and trained a YOLO model for visual recognition.
- Developed an AI proof of concept for marketing across web, mobile and Apple Vision Pro, usable online and offline, with Angular, Ionic and Swift.

Stack: Python · Angular · Ionic · CI/CD · Docker · Swift

Education

Politecnico di Torino
In progress

Master's degree in Computer Engineering

Track: *Computing and Network Infrastructures*: cloud computing, distributed systems, computer architectures, and enterprise networks. Member of PoliTO's **Dual Career** programme, combining university studies and competitive sport.

University of L'Aquila
March 2025

Bachelor's degree in Computer Science (100/110)

Studies in software development, AI/ML, web engineering, and object-oriented programming. Thesis: *Computer Vision and Mixed Reality for Product Prototyping with Apple Vision Pro*.

Personal Projects and Infrastructure

Self-hosted infrastructure and services

Proxmox · LXC · ZFS · VLAN · Traefik · Pocket ID

I design a home infrastructure to host and integrate services: Proxmox VMs/LXC containers, ZFS storage and a VLAN network. I centralize service access with Traefik and Pocket ID and build home automations with Home Assistant.

AI assistant, voice and automation

Python · Hermes · LiveKit/SIP · MCP · Docker

I develop Python extensions for Hermes: specialist agents, memory and task automation. I integrate real-time voice and LiveKit/SIP telephony, MCP connectors and authorization controls, with persistent request and result handling.

Other software projects

PHP · JavaScript · MySQL · OpenAPI · Python · Java/JavaFX

Developed an e-commerce application with order management and administration, a REST platform for university rooms and events, and a Java/JavaFX car rental application. Implemented a Python recommendation system with static and dynamic preferences and a small neural network from scratch.

Competitive Sport

Competitive dance

International-level dancer and **17-time Italian champion**. Competition has taught me to manage pressure, plan goals and turn feedback into improvement: an approach I apply at work when handling unexpected challenges and delivering on commitments.

Soft skills: Communication and listening, collaboration across technical roles, independent problem solving and adapting to new tools.

Languages: Italian (native), English (Cambridge B2).

I authorize the processing of the personal data contained in my resume in accordance with LD. 196/2003 and EU Regulation 2016/679.
